

Keeping secure - Devices concerned with security

Moderately open briefs

- Design and make a device that will keep small valuable items at home safe from theft
- Design and make a device that will prevent the stealing of personal items in crowded, public places
- Design and make a system that will protect a small outbuilding from intruders

Closed Briefs

- Design and make a small alarm system that will give a loud audible warning if anyone attempts to steal your bicycle
- Design an anti-theft system to be installed in a small jewellery box
- Design and make an anti-theft system that can be used to protect items of luggage from being stolen from luggage racks in trains and buses
