

Projects in a pack

A full set of selected resources to support your primary school deliver high-quality design and technology.

Includes templates to support local company sponsorships.

Join the **D&T Association** today at www.data.org.uk or by calling us on **01789 470007**

Stay at the forefront of developments...

The **Design & Technology Association** are fully aware of the great strains on a primary school when setting up design and technology provision.

Please look though the pack to see the different options from both **Heart** and **Tilgear** and good luck on your D&T journey!

Please note: items required for the teaching of cooking and nutrition are not included as most can be singly purchased from supermarkets or similar.

Some additional items are recommended (and stated) that could not be included as part of 'Projects in a Pack'.

Knowing what are suitable materials and resources to inspire D&T teaching and learning and also where to get them from can be problematic.

Sometimes the amount of choice can be overwhelming and can also take valuable time to do. Add to this financial constraints in many schools and there is a clear issue that needs addressing.

The **Design & Technology Association** have worked in collaboration with our friends at **Heart Educational Supplies** and **Tilgear**, to provide primary schools with a free, simple, purchasing model that hopes to eliminate many of these problems.

'Projects in a pack' is an easy-to-buy set of resources that have been chosen to complement the D&T Association's popular 'Projects in a page' scheme of work, but is suitable even if this is not used. The three tiers (Gold, Silver and Bronze) provide different options depending on budgets, but all will provide schools with everything you need to implement D&T in your school.

When the time comes to reorder materials, each pack will come with relevant codes so you can quickly replenish stock knowing you are getting the resources you want.

Each tier of resources is at a discounted rate and free shipping, therefore providing the best possible value for schools.

In addition, the pack also has templates to use to approach local industry asking them for sponsorship of resources. Your local network of designers and manufacturers such as engineering firms, architects and food processing firms should be very keen to support D&T in their local areas and even companies such as the local supermarket can be un-tapped resources to provide financial help to schools and can potentially mean these amazing resources come at no cost to your school!

Join the D&T Association at: www.data.org.uk

About us

The **Design & Technology Association** is a membership organisation providing advice, support and training for those involved in teaching design, engineering and technology.

For further information, membership options and for details in 'Projects on a Page' visit www.data.org.uk

Heart Educational Supplies is a school supplies specialist with over 13,000 products and 30 years' experience supplying textiles and technology supplies to schools and businesses. For further information on their product range, visit www.heart-educational.co.uk

Tilgear have been established since 1965 and pride themselves on being the one-stop-shop for every element of the D&T workshop. For further information on their product range, visit www.tilgear.info

Industry support

Local Industry provides an opportunity to support schools in a number of ways.

Local industry are a potentially valuable (untapped) resource. Many schools have never tried reaching out to local companies to try and get their support.

Whilst there is no set rules as to type of companies to contact, local design and manufacturing firms many be more likely to appreciate D&T education. You could offer to pop something in your newsletter / website about the sponsorship.

Materials can also be sourced from local industry. Off cuts of materials such as cardboard, wood and fabrics from a company, are valuable resources for a school and prevent you having to dip into your budget. A local packaging/removals company for example could keep you in a supply of cardboard for years!

Consider your parents and other stakeholders too. A businesscard drop-box in reception or a note in the newsletter many uncover valuable resources you didn't know existed! They could also provide the contextual brief for your next unit and may have industry experts on hand to help and inspire?

We'd love to hear about your industry engagements. Contact us at info@data.org.uk to share your stories.

Call us on **01789 470007**, email membership@data.org.uk

Dear [Company]

Design and technology is a vital subject for all young people. It is a perfect vehicle to enable pupils to develop a wide range of skills and attributes such as creativity, problem-solving, communication and empathy. It is also a great opportunity to embed the practical application of knowledge gained from other subjects such as mathematics and science and can be the subject in school where pupils really excel, and learning becomes exciting and relevant for them. However, one of the main barriers is often the initial set-up cost on a small school budget.

We very much value the importance of design and technology at [School Name] and would love to give our pupils the chance to experience and engage in quality, modern, design and technology education. As a highly valued local company I am sure you would agree that giving young people in the community the best start in life is of key importance to you. We would love it if [Local company] was willing to sponsor a starter D&T pack for the school.

The D&T Association (www.data.org.uk) has worked alongside educational suppliers to provide discounted resource packs for primary schools. These feature carefully selected tools, materials and other equipment to create an inspiring D&T curriculum and kick-start pupils' passion for design and technology. The packs feature opportunities to explore Computer Aided Design, textiles, electronics and much more!

There are three tiers available, priced between £XXX and £XXX. If this is something that may be of interest to you, we would love to discuss the possibility of promotion/branding to highlight your generous sponsorship and support for creative, technical education in the local community.

I have attached the sponsorship packages for your consideration.

Very best wishes,

[Name and position]

BRONZE

The **Bronze package** features the essentials for a school to start their D&T journey.

- Motors, Pulleys & holders -> 10
- Safety Rules -> 10
- Cutting Mats -> 5
