

Super Soaker

Lonnie Johnson's Splash of Genius!

Lonnie Johnson is a former NASA engineer who worked on the Galileo mission to Jupiter. In the late 1980s, while working on an eco-friendly heat pump, Lonnie stumbled upon the idea that would become the Supersoaker.

With his engineering skills and creative spark, he transformed a simple idea into a high-powered water blaster. Released in 1990, the Supersoaker became an instant hit, redefining water toys and making every summer a splash-filled adventure. >>
